## LEARN MORE ABOUT WHAT WE OFFER

### Public Works Business Operations and GFEBS

Areli provides help desk, data entry, operations and analysis support in the areas of Production Management, Facilities Management, Warehouse Management & Operations, Real Property Audit Readiness, GIS, and CADD Support. Areli leverages our highly skilled business operations resources to effectively manage data in the General Funds Enterprise Business System (GFEBS) and Collaboration Projects (cProjects). Operating in an environment of continuous process improvement, Areli effectively integrates and utilizes data to answer critical production and operations questions that leadership require for successful program execution. Areli provides real property, physical inventory, GFEBS RE80, Real Property Planning and Analysis System (RPLANS), Installation Status Report (ISR) Infrastructure analysis and audit readiness services resulting in top auditor marks for Army installations and other DoD sites. Through the provision of well-executed support, efficient systems, and high-quality deliverables, Areli experts remain at the forefront of installation readiness, process improvement and authoring DoD policy recommendations.

### GIS & CADD Services

Areli's team of experienced professionals specializes in maximizing client resources to provide the highest quality GIS and CADD services. This team of industry-recognized GIS Specialists provides comprehensive geospatial and CADD services for the management of Federal, State, and Local programs, facilitating leadership decision support with accurate, timely, and relevant geospatial data. Specifically, Areli analytical expertise has been utilized by Army HQ to author IGI&S policy recommendations. We maintain a team of skilled personnel trained on industry best practices for drawing management, drawing editing, project planning, and in-depth analysis to answer critical infrastructure questions related to infrastructure and facility management. Areli assists GIS and CADD users with the development of training and documentation to standardize best practices and outline software utilization. We also develop GIS and CADD standards, organize and centralize project files, create and update data, assist DPW Engineers in designing construction drawings and plans, and create and update floorplans for inclusion in ePRISMS. Additionally, Areli supports GIS and CADD system design and configuration to ensure availability of GIS and CADD software and associated applications.

### Training Development & Instruction

Through successful performance on multiple contracts at the Headquarters Department of Army (HQDA) and Installation Management Command (IMCOM), Areli obtained and demonstrates relevant knowledge and experience to review, develop, and update interactive training utilizing our extensive ADDIE training model expertise. This entails fully understanding the training audience and goals, reviewing the current training platforms, engagement with the customer on potential avenues to improve and develop course material, instruction, and practical exercises with the latest guidance. We successfully develop resource-linked electronic books (eBooks), manage online testing and certification, and introduce multiple Areli and government instructors based on the subject matter. We also develop self-paced training that provides audiences with in-depth instruction under limited course time-duration requirements.

### Enterprise System Development, Security & Operations

For dependable analytics, clients must have a powerful backbone to warehouse and query data. Areli offers professional services to answer all your enterprise system challenges, keeping your data safe and accessible. Our cloud experts are trained and certified for Microsoft, Amazon, Oracle, IBM, and other platforms to confidently execute Agile sprints, perform maintenance tasks, and manage the security and administrative controls for client enterprise systems and databases. Additionally, Areli has successfully migrated enterprise systems to FedRAMP cloud environments with full authorization to operate (ATO).
